Professional Summary

Junior Analyst with hands-on experience in market research data processing, survey programming, and BI dashboarding using Power BI, IBM SPSS, WinCross, SQL, and Python. Turns raw survey and customer data into clear, decision-ready insights for clients and senior stakeholders.

Experience

Goignis Circle **Jan 2026 – Present**

Junior Analyst

- Build interactive Power BI dashboards (20–30 visuals per report) with filters by store, gender, and area for client-facing insight reports
- Process and analyze multilingual survey data in IBM SPSS and WinCross; produce cross-tabs, funnel analysis, and statistically tested findings

Market Research Intern

- Programmed client questionnaires in LimeSurvey with advanced logic, piping, quotas, data validations, and multilingual flows
- Analyzed **1,500+ responses across 2 languages** in IBM SPSS and WinCross; delivered cross-tabulations and funnel analysis for client research reports
- Built Excel dashboards with advanced formulas and crosstab calculations to support senior executive presentations

Data Analyst Intern at Edulyt **Jul 2025 – Aug 2025**

- Analyzed customer credit behavior data **(5K+ records)** and wrote SQL queries to compute credit utilization metrics and KPIs
- Created BI reports identifying a **15% customer segment** with overuse anomalies

AIML Intern at Edunet Foundation **Jun 2025 – Jul 2025**

- Built a Python classification model to predict whether income exceeds $50K, **achieving 87.08% accuracy** through preprocessing, feature selection, and hyperparameter tuning

Projects

e-Commerce Transactions Analysis - Python, Clustering **Jan 2025**

- Segmented 1000+ customer records into **five behavioral groups** using K-Means to support targeted retention and acquisition strategies
- Built a logistic regression model to identify high-value lookalike customers for targeted marketing campaigns

RCA on Employee Attrition - Python, SQL **Dec 2024**

- Built an attrition RCA framework across compensation, workload, and career growth; used feature engineering to uncover high-risk employee segments
- Identified key drivers: overtime, low salary, poor satisfaction, and promotion gaps

Skills & Expertise

- **Analytics & BI**: Power BI, Excel (Pivot Tables, VLOOKUP, Data Validation, Dashboards), IBM SPSS, WinCross
- **Programming & Data**: Python (Pandas, NumPy, Matplotlib, Scikit-learn), SQL (Joins, CTEs, Window Functions, Subqueries)
- **Survey Research**: LimeSurvey programming, questionnaire logic, crosstabulation, funnel analysis
- **Statistical & Analytical**: Statistical Modeling, Feature Engineering, Clustering, Classification, Root-Cause Analysis
- **AI Tools & Other**: Claude, Claude Code, prompt engineering, agentic AI workflows; GitHub

Education

NIT Durgapur, West Bengal – *Integrated M.Sc. in Chemistry* **Dec 2021 – May 2026**
JNV Bolangir, Odisha – *Class X & XII (CBSE)* **Jul 2015 – Apr 2019**

Certifications

Claude 101 and Claude Code 101 – Anthropic **Jul 2026**
Advanced Excel Formulas & Functions – Maven Analytics **Feb 2026**
The Ultimate MySQL Bootcamp – Udemy **Jun 2025**

Positions of Responsibility

- **Video and Production Head, MNTC**: Led a 12-member creative team (2 video editors, 10 designers) producing monthly posters and videos
- **Senior Coordinator, Technology Festival**: Oversaw end-to-end event execution and timely delivery
